

# 一個查詢系統設計之研究

張昭嬌

A STUDY ON THE DESIGN OF INQUIRY SYSTEM

Chang Kau-Kiau

## 摘 要

本文之研究目的是提出一個查詢系統設計原理，俾供決策者順利完成突發性決策制定為宗旨。

從查詢的演繹邏輯、資料結構與程式設計等方面，說明查詢系統設計原理。

結果從數值分析技巧中，發現查詢方法可以做到多重任一鍵的查詢，達到非常便捷的操作目的。

## ABSTRACT

The purpose of this article attempts to analyze a design of inquiry System for the manager to complete an occasional decision making.

Algorithm, data base management and PASCAL programming are used to answer the principles of inquiry system design.

This article's finding indicate that the method of multiple any keys for inquiry system is pretty useful.
